MATERIAL SAFETY DATA SHEET

SECTION 1: IDENTIFICATION OF MATERIAL AND SUPPLIER

Product name        Vulcanising Rubber 15.100.061
Other names         Vulcanising Rubber 15.100.062
Recommended use     Stamp Rubber

Supplier name       Astron Industries Pty Ltd
Address             8-10 Norwich Avenue
                     Thomastown, Victoria, 3074
Telephone no.       03 9460 7577 (09:00 – 17:00 hours)

SECTION 2: HAZARDS IDENTIFICATION

Inhalation          Not applicable
Ingestion           Not applicable
Eye contact         Not applicable
Skin contact        Natural rubber based compound, unlikely to affect many individuals.

It is the fumes and vapours that may be generated during product processing that may be hazardous rather than the Natural rubber based compound.

SECTION 3: COMPOSITION/INGREDIENT INFORMATION

SECTION 4: FIRST AID MEASURES

Inhalation          Remove to fresh air if exposed to fumes, decomposition products or high temperature emitted vapours. Seek medical treatment in cases of extreme exposure.
Ingestion           Seek medical treatment in the event product consumed.
Eye                In the event of eye contact with fumes, immediately flush with plenty of water.
Skin               Skin contact with hot compound or decomposition products, immediately rinse skin with cold water, and wash off with soap and water.

SECTION 5: FIRE FIGHTING MEASURES
Extinguishing media
Water, foam, carbon dioxide, dry chemical

Hazards from combustion products
Natural rubber compounds are combustible and generate CO\textsubscript{x} and complex fumes derived from the decomposition products of organic accelerators, antioxidants, activators, plasticizers and process aids.

Special protective precautions
Rubber fire is difficult to extinguish since the heat may soften the rubber and burning material liquefies and may spread fire. Some rubber compounds are lighter than water so that burning material may float on available water.

Equipment for fire fighters
Wear a self-contained breathing apparatus with full-face piece operated in pressure demand or positive pressure mode, and protective suit.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Emergency procedures
Solid products unlikely accidental release.

Methods and materials for containment and clean up
Sweep up material and dispose of appropriately.

SECTION 7: HANDLING AND STORAGE

Safe handling
When moulding, extruding and curing Natural Rubber compounds, operate at temperatures as low as practicable, in consideration of hazards and economic throughput. Sufficient local exhaust ventilation must be provided to ensure safe working.
Do not consume food when handling compound, avoid inhalation of curing fume and vapours.
Practise good personal hygiene after using this material.

Safe storage
Store in cool place (<25 °C) out of direct sunlight. Store away from sources of heat or ignition.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

National exposure standards
The C.O.S.H.H regulations state that rubber fume must be contained within a maximum exposure level of 0.6 mg/m\textsuperscript{3} TWA (time weighted average) January 1990.

Biological limit values
Not determined

Engineering controls
Provide local exhaust ventilation systems during moulding, extruding, curing ie when processing product. Local exhaust is preferred because it prevents contaminant dispersion into work area by control at source.

Personal protective equipment
When processing product recommend use of protective eyewear and hand utensils/coverings to prevent contact of hot rubber with skin.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

Appearance
Template cut sheet interleaved with polythene

### SECTION 10: STABILITY AND REACTIVITY

**Chemical stability**  
Product is stable in cool well ventilated conditions

**Conditions to avoid**  
Vulcanised Natural rubber compounds are generally stable up to temperatures of 70 °C in continuous use. After prolonged heating above these temperatures they will start to decompose, emitting fumes and vapours around 300 °C.

**Incompatible materials**  
Not available

**Hazardous reactions**  
Not available

**Hazardous decomposition products**  
Decomposition fumes and vapours may be toxic and flammable.

### SECTION 11: TOXICOLOGICAL INFORMATION

- **Health effects from the likely routes of exposure**

### SECTION 12: ECOLOGICAL INFORMATION

**Ecotoxicity**  
Not available

**Persistence and degradability**  
Not available

**Mobility**  
Not available

### SECTION 13: DISPOSAL CONSIDERATIONS

Dispose of product/spills in accordance with local, State and Federal regulations at an approved waste disposal facility by incineration and/or approved landfill for chemical/special waste.

### SECTION 14: TRANSPORT INFORMATION

**UN number**  
Not allocated (not subject to transport regulations)

**UN proper shipping name**  
Not allocated

**Class and subsidiary risk**  
Not allocated

**Packing group**  
Not allocated

**Special precautions for user**  
Not determined

**Hazchem Code**  
Not allocated

Not classified for DOT, IATA or IMDG.
SECTION 15: REGULATORY INFORMATION

No Poisons Schedule number allocated to the substance.

SECTION 16: OTHER INFORMATION

- Date of preparation of the MSDS January 2005.
- Date of Review August 2012.
