Printers by Shiny

Shiny self-inking stamps work and feel as great as they look.

Just one impression and you will appreciate the ergonomic shape and heavy duty construction. Precision components ensure a smooth, quiet action and many years of trouble free operation.

A full size index window lets your customer choose the correct stamp every time and the superior quality pads will produce thousands of impressions without re-inking!

Shiny self-inking stamps are an excellent choice for your high volume stamping needs. They have been mechanically tested to over 1.000.000 impression cycles.

No other stamp looks like it; no other stamp works like it!

Shiny Printer

The original Shiny Printer still works as well as ever. With the inclusion of superior materials in the pad, the time tested Printer provides great results at an affordable price.

Shiny Printer Dater

Like the original Shiny Printer, the Shiny Printer Dater still works as well as ever. Renowned for their durable bands, Shiny Printer Daters are the preferred choice of many customers with high volume needs. The time tested Printer Dater provides great results at an affordable price.

Special locking grooves on the back of the date bands provide a sure positioning system for accurate and consistent alignment of the bands.

Shiny Premium Printer

Designed as a Premium Product for the most discerning user, the Premium Printer features many new design concepts. From the soft touch grip to the non slip feet, the Premium Printer has been designed to impress the most discerning stamp user.

Described as "*the best self inking stamp ever made*" by one of Australia's leading stamp manufacturers, Premium Printers are available in a limited range at a higher price than other models.

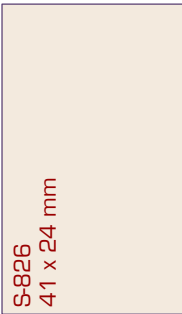

Shiny New Printer

Incorporating many of the design features of the Premium Printer, the New Printer provides an economic option without the additional expense.

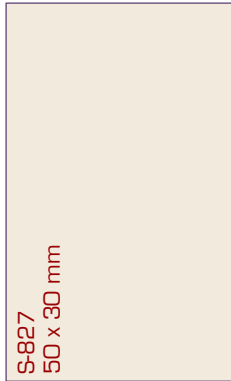

- Note: All Shiny Printers are supplied with a pad (Black, Blue, Red or Dry only) and are available singularly. Bulk packs of 12 are available.
- Replacement Pads are available in packs of 5 in Black, Blue, Red, Dry, Green or Violet.

Essential Stamps

A distinctive heavy-duty stamp designed for frequent and long-term use.

The patent-pending band cover and strong structure are designed to ease the handling of a heavy-duty stamp. The special soft handle provides better handling to help users to stamp more easily and comfortably.

Soft Handle

The handle will not cramp your hands, and the soft material provides a comfortable feel.

Lock Button

The lock ensures easy operation for stamp makers, and for the users when changing the ink pad and adjusting the dates or numbers.

Full Size Display Window

Full-size display window clearly shows a full impression of the stamp.

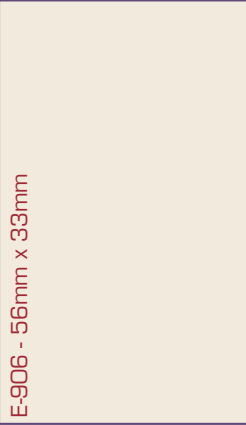

Solid Construction

The curved metal frame ensures durability for frequent use. The new silent device allows quieter and smoother movement.

Non-slip feet keep the stamp in place and ensures quiet operation.

Shiny is using recycled plastic materials to produce their ECO line of products. The PET products within the ECO range are made from waste soft drink and water bottles.

This is reducing the consumption of fossil fuels and lowering CO2 emissions. It also reduces waste which is becoming an environmental nightmare world wide.

A limited range of self inking stamps has been released and is now available.

PET-842	38 x 14 mm
PET-843	47 x 18 mm
PET-844	58 x 22 mm
PET-846	65 x 27 mm

All available with either a Black, Red, Blue or Dry pad.

Low Emissions Manufacturing

All products in our LEM collection are finished **without using any water** whatsoever and are produced **without chemicals** so you can be sure nothing goes down your drain.

You can also **say goodbye to complaints** from your staff and customers about dust and offensive odours. LEM uses light or heat to seal the surface of a foam text plate in just a few seconds so the process is **clean and odour free**.

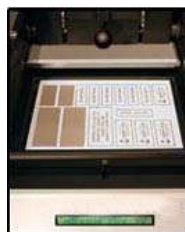

Much **less power is used** in the LEM process than any other method currently available. So little, in fact, that a 100 watt globe left on for one hour uses more power than is required to process a batch of LEM stamps!

All products in the LEM collection are designed to be re-inked so replacement pads, the waste that they produce and the problems they create in inventory can all be eliminated.

In short, the LEM method has the **lowest overall environmental impact** of any stamp manufacturing method presently available and is the **obvious choice** for environmentally aware manufacturers and consumers alike.

LEM - an initiative of Astron Industries designed to make it easy for our customers to **produce rubber stamps for a greener world**.

LEM - The Collection

1. Lay your laser printed vellum onto the glass plate and cover with clear film
2. Place the text plates over the artwork within the alignment lines.
3. Close the clamp and lock into place.
4. Activate the machine. The process will complete in about 20 seconds.
5. Select the colour of ink required from our range of 12 colours and apply to the text plate.
6. Assemble the stamp according to the specific instructions for the product being processed.

iStamp[®] Pre Inked Stamps

iStamp represents the next generation of premium pre-inked stamps.

Your customers will appreciate the modern, soft touch handle and the smooth operation of the mount while you will enjoy the robust construction and the wide range of sizes available.

iStamps are manufactured by the LEM process so you can be confident when recommending iStamp to your environmentally aware customers.

Like all products in the LEM family, iStamps can be re-inked indefinitely to deliver hundreds of thousands of impressions and, when the time is right, they can be re-used by replacing the text plate and ink cartridge.

Inked cartridges are available ready for use with Black, Red or Blue ink. Additional colours can be offered using the convenient dry cartridges.

iStamp IS-75 - 128mm x 42 mm

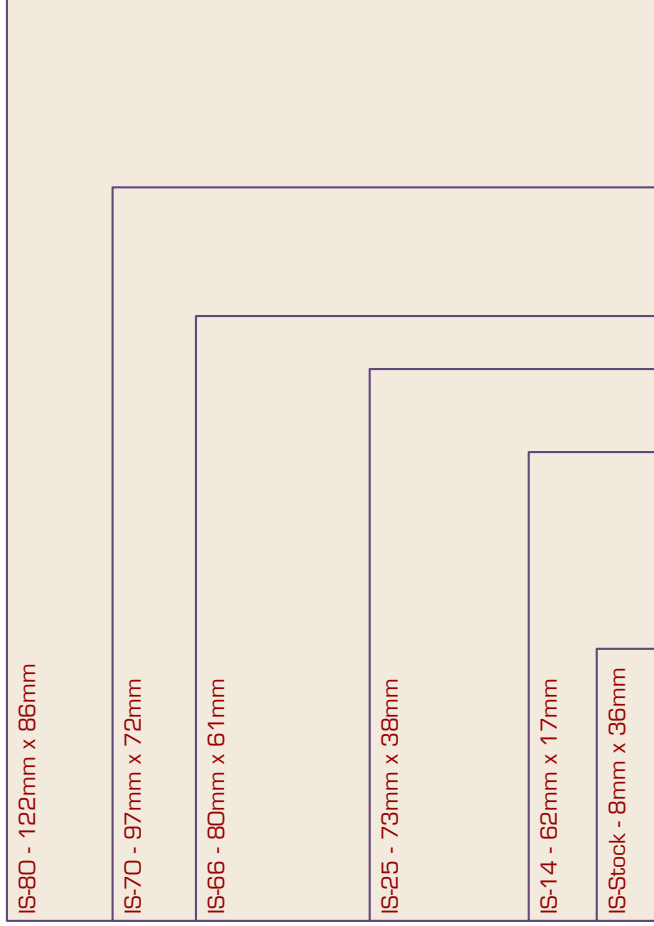

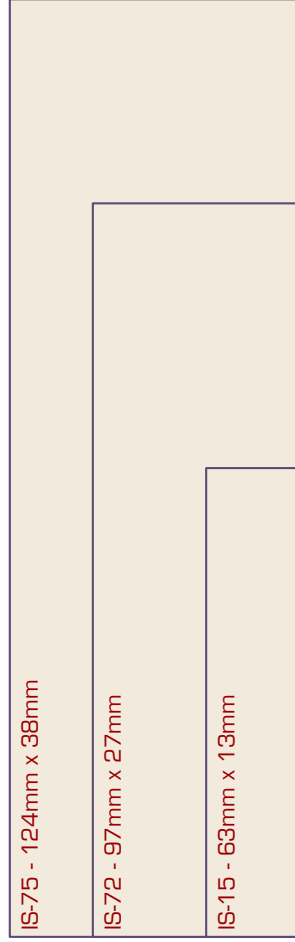

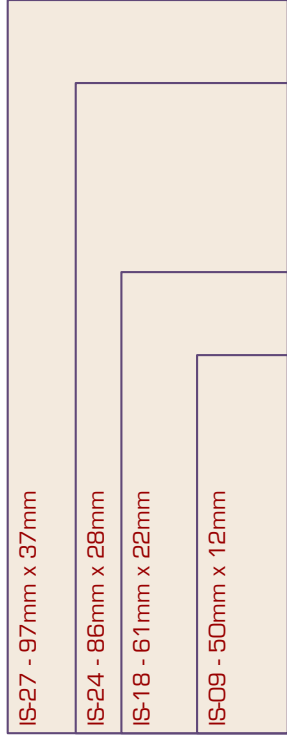

iStamp IS-80 - 126 mm x 90 mm

Like all products in the LEM family, iStamps can be re-inked indefinitely to deliver hundreds of thousands of impressions and, when the time is right, they can be re-used by replacing the text plate and ink cartridge.

multisurface™ PRE-INKED STAMP by iStamp®

Multi surface Stamps by iStamp represent the next generation of products for non-porous applications offered by Astron.

Your customers will appreciate the modern, soft touch handle and the smooth operation of the mount while you will enjoy the robust construction and the wide range of sizes available.

Multi Surface Stamps are manufactured by the LEM process so you can be confident when recommending iStamp to your most environmentally aware customers.

Like all products in the LEM family, Multi Surface Stamps can be re-inked indefinitely to deliver hundreds of thousands of impressions and, when the time is right, they can be re-used by replacing the text plate and ink cartridge.

Multi Surface Stamps are made with Shiny Non Porous ink. This Ink prints on glossy paper, photos, fabric, glass, metal most plastics and is water resistant.

Available in 15ml, 500ml and 1 Litre bottles. (1 Ltr indent only) We recommend that this Ink be tested on a sample piece or in a non critical area of the item to be imprinted to ensure that the correct results are achieved.

Inking and Assembly Procedure

Step 1) Have your porous foam flashed or thermal processed.

Note: We suggest you add a flash or increase the intensity, for better results.

Step 2) Place porous foam face down on gram scale and zero out.

Step 3) Apply Ultifast® Ink onto porous foam (see ink-load below) and let it absorb.

Step 4) Immediately after ink is absorbed by the porous foam, lay the dry cartridge on top of porous foam and zero out scale.

Step 5) Apply Ultifast ink onto dry cartridge (see ink-load below) and let it absorb.

Note: It is normal to see dry spots. Do not wait for ink to cover cartridge

Step 6) Immediately after ink is absorbed, insert inked porous foam and cartridge into the mount.

Step 7) Position and center the inked assembly and snap trim ring into place.

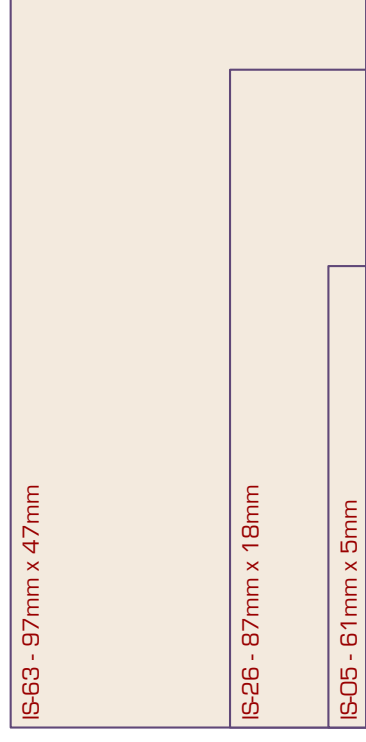

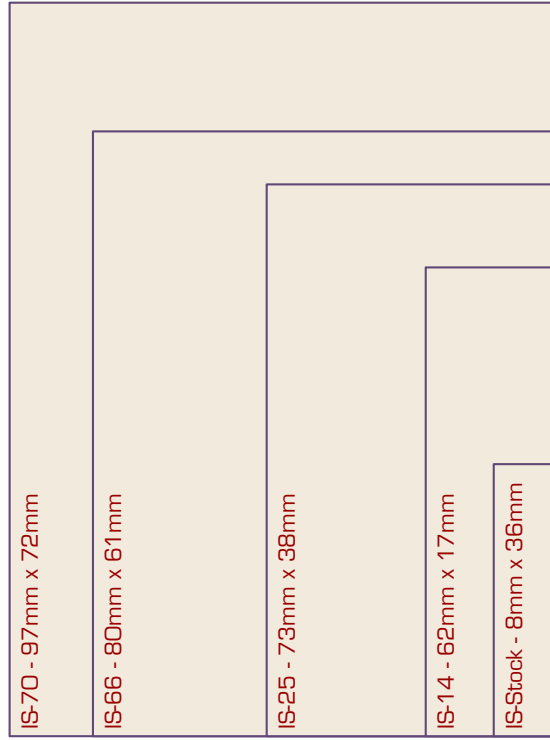

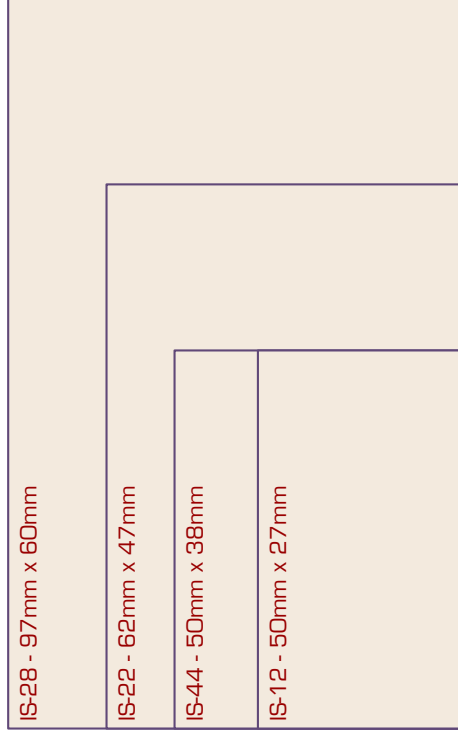

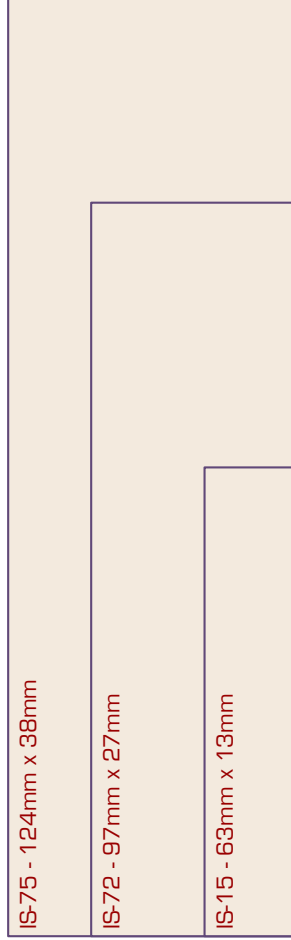

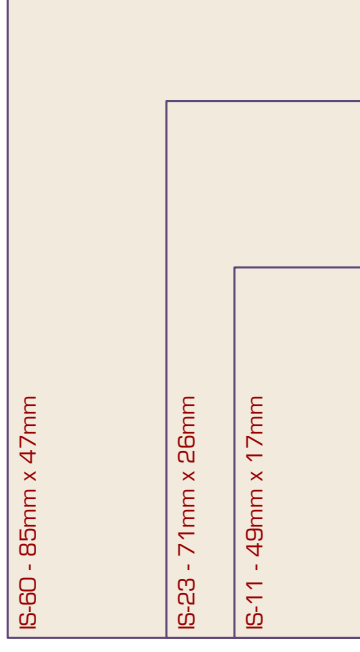

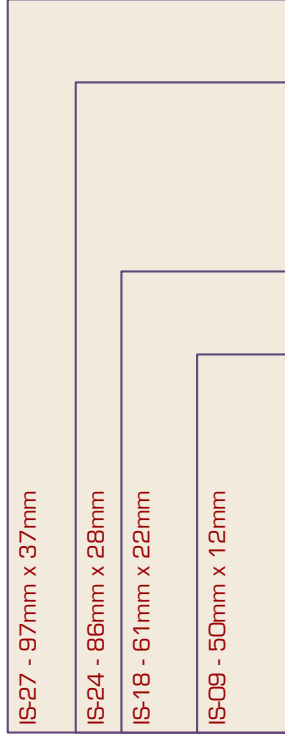

Step 8) Snap dust cover on.

Step 8) Stamp is done. Dust cover must remain on when not in use to prevent ink from evaporating.

Premium Self Inking Stamps

PSI Stamps deliver three to five times the number of impressions of a traditional self-inker.

While you may be constantly replacing pads for other brands, PSI Stamps just keep going and going.

No replacement pads are ever required, eliminating wasteful plastic, foam and ink .

The patented "Z" concept makes re-inking very simple and fast.

After adding ink, the stamp is ready in 30 minutes. Re-ink indefinitely for hundreds of thousands of impressions.

Better than recycling, the PSI allows you to customise your message by ordering just the "printing portion".

By keeping the original stamp mount you are eliminating the need to purchase an entire new stamp. More cost effective for you and less contribution to landfill.

And what about the TWELVE ink cartridge colours now available. This alone is a great step forward for your customer.

- Easy Assembly
- Professional Presentation
- Smooth and Quiet
- Outstanding Impression Quality
- No Stamp Pad Required
- Full Index Label
- 12 Ink Colours
- Cost Effective

Inking PSI Stamps

1. Slide the door from the cartridge. Remove and expose text plate. 2. Replace text plate and foam. Fill cavity with ink. 3. Close door making sure indents line up. 4. Replace completed cartridge.

Like all products in the LEM family, iStamps can be re-inked indefinitely to deliver hundreds of thousands of impressions and, when the time is right, they can be re-used by replacing the text plate and ink cartridge.

Premium Self Inking Stamps

PSI 4141 - 41mm x 41mm

PSI 1919
19mm x 19mm

SLIM STAMP™

At less than 25mm (1") thick Slim Stamps are designed to fit easily into your customers briefcase, handbag or pocket.

Better still, they don't require a separate stamp pad and can be inked with any of the 12 ink colours available in the LEM Range.

The patented ink cartridge makes inking very simple and fast. After adding ink, the stamp is ready within 30 minutes and can be re-inked indefinitely for hundreds of thousands of impressions.

SlimStamps allow you to replace the text plate easily so your customer can retain the original stamp. More cost effective for your customer and less contribution to landfill.

- Easy Assembly
- Professional Presentation
- Smooth and Quiet
- Outstanding Impression Quality
- No Stamp Pad Required

NSP 2165	21 X 65 mm	NSP C-45	45 X 45 mm circle

NSP Series stamps represent the blending of a traditional rubber stamp style with the very latest processing technology. Designed with the cost conscious customer in mind, NSP Series stamps are a low cost product for processing with Rapid Process Technology. This allows rubber stamp manufacturers to provide an economical product without expensive materials and time consuming processes that traditional rubber stamps require.

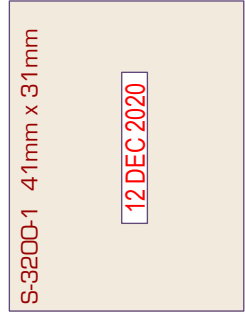

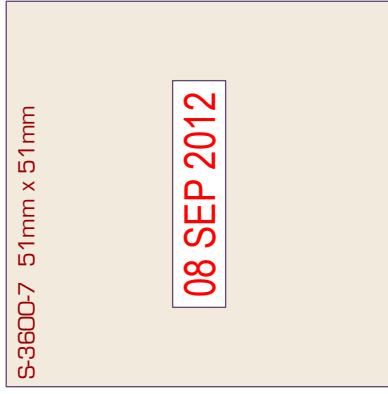

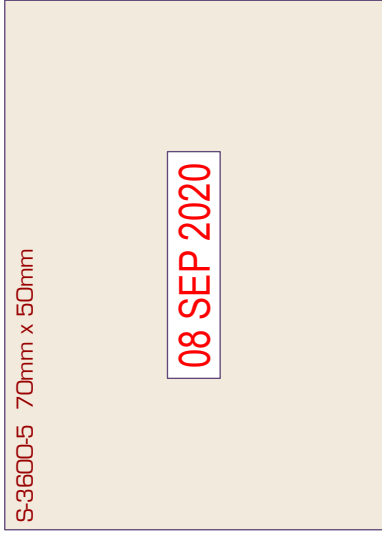

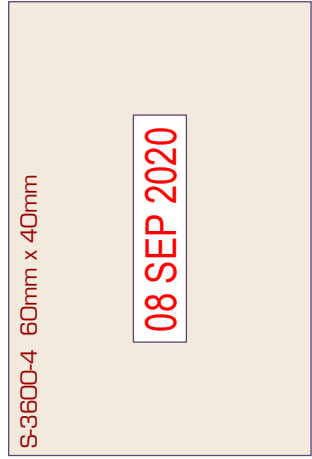

NSP Series stamps are assembled as easily as self inking stamps and can deliver up to 10,000 high quality impressions on a single ink load. Like all our pre-inked stamps, NSP series stamps can be re-inked time and again for thousands more impressions.

- 15 sizes
- 12 Ink Colours
- Full index area
- Outstanding impression quality
- Lasts twice as long as self-inkers
- No stamp pad required

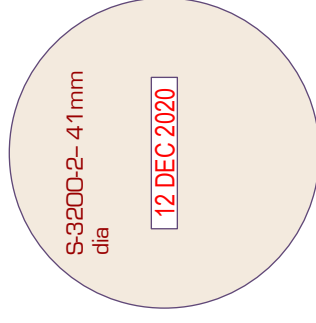

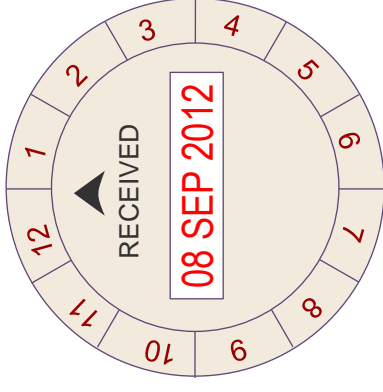

1. Remove foam after exposing. Fill capacity 80% with ink.
2. Replace foam, Remove adhesive
3. Place mount onto text plate
4. Attach text plate and handle

Vuestamp®

TRADITIONAL HAND STAMPS

Vuestamp mounts were introduced into the Australian market place as an alternative to wooden strip mounts

Today, the majority of Australian rubber stamp manufacturers are using Vuestamp mounts.

Vuestamp mounts provide stamp manufacturers with a variety of advantages

1. See through base for instant message identification
2. Quick and easy to assemble enabling fast stamp turnaround
3. No cutting, sawing, sanding drilling or gluing

Cost Saving

Vuestamp mounts cost less, simply because a size can be selected and completely assembled ready for sale in a fraction of the time taken to produce an equivalent wooden mount.

Indexing for ease.

Vuestamp mounts are always supplied with full size index cards - pre-trimmed to the exact size. Presentation can be easily enhanced with computer generated artwork, if cut to size and inserted in place of the index cards provided.

Adhesive Tape Backing

All Vuestamp mounts are provided with the best quality adhesive tape already attached, and are also available with sponge adhesive for the best results.

Optimum Image Transfer

Every Vuestamp size is available with foam adhesive to ensure even pressure across the surface for optimum results printing dies.

Convenient to mail

Vuestamp mounts can be mailed in two parts. Just ask your customer to push the handle onto the base This feature provides smaller packages for postage.

Large Size Range

50 different sizes are available that ensure a fit for practically every size requirement.

AWARD WINNING VUESTAMP MOUNTS HAVE PROVEN TO BE AN INVALUABLE PRODUCT FOR LEADING RUBBER STAMP MANUFACTURERS THROUGHOUT AUSTRALIA AND THE SOUTH PACIFIC REGION.

Fold A Stamp Compact Corporate Stamp

FOLDASTAMPS were originally designed to compliment the storage of Company common seals when businesses required a convenient way of keeping seals together with printed document files.

FOLDASTAMP mounts are moulded from tough polycarbonate plastic; feature a fold flat handle which not only provides easy file storage, but are nice and compact to travel through the mail in their folded state.

Accessories include clip-on self adhesive "shoes" for easy stamp die attachment, together with individual cut to size proof cards. To complete the package, clear plastic wallets used for storing FOLDASTAMPS are available in single and double stamp sizes so that seals can be stored in loose leaf folders. We even have a solution for mass storage in filing cabinets.

Embossing Labels

Designed specifically to be embossed with either a pocket embossing machine or a desk embossing press, Shiny Craft Labels are available in 4 colours and 2 convenient sizes.

Embossed labels add an elegant touch to stationery and books, and prestige to award certificates and official letters and documents.

The labels are produced from heavyweight metalised label stock to provide a rich, lustrous finish. They provide an eye-catching high-relief embossed image every time and will adhere to most paper products.

Shiny Craft Labels are available in 4 colours and 2 sizes.

Premium Cast Desk Embossers

MR-0/CHROM

EMR-0/GOLD

MR-0/BLACK

Rectangular die holders for name and address or monograms.

CLASSIC WAY TO MAKE A GREAT IMPRESSION!

These elegant precision made, cast desk embossers make a fine addition to any desk or office.

The embossers are metal cast, then individually polished by hand to create a smooth, beautiful surface. They are available with a baked-on black epoxy finish, a plated 24K lustrous gold flashed finish or a lustrous chrome plated finish.

The die holders are removable and interchangeable, and are available in standard 1 5/8" (41mm) diameter and 1" x 2" (26mm x 51mm) rectangular die sizes.

Great for executive gifts, notaries, lawyers, personal embossers, name and address and much more. A perfect gift for the person who has everything!

Embossing Seals

All Shiny Embossing Presses have been engineered with a unique double fulcrum system to produce higher pressure with minimum effort while producing excellent impressions time after time .

Reinforced high strength steel is used in all Shiny Embossing Presses to ensure durability and rigidity while also delivering consistent quality.

Shiny EM Pocket Seal

Available with either 41mm diameter round die holder, 50mm diameter round die holder, 25mm x 50mm rectangular die holder or 41mm x 41mm square die holder. Suitable for laser engraved dies and counters only.

The die holders used in this model are interchangeable with the Shiny ED Desk Seals.

Shiny ED Desk Seal

Available with either 41mm diameter round die holder, 50mm diameter round die holder, 25mm x 50mm rectangular die holder or 41mm x 41mm square die holder. Suitable for laser engraved dies and counters only.

The die holders used in this model are interchangeable with the Shiny EM Desk Seals.

Shiny EH Heavy Duty Desk Seal

Available with either 50mm diameter round die holder, or a 50mm x 50mm square die holder. Suitable for laser engraved dies and counters only.

Allows you to emboss the paper 55mm (2-1/4") from the centre of the die to the edge of the paper.

JustRite Extra Long Reach (ELR) Desk Seal

Allows you to emboss the paper 4-1/2" from the centre of the die to the edge of the paper.

Available with either 50mm diameter Round die or 75mm x 25mm Rectangular die.

Automatic Numbering Stamp

The SureMark SQ-3366 Automatic Numbering Machine features 6 metal wheels/7 actions (repeat, consecutive, duplicate, triplicate, quadruplicate, 6 times and 12 times), drip ciphers precision movements, lustrous chrome finish and four colour packaging designed for rapid inventory turnover.

A stylus for indexing and a black ink refill are included.

SureMark Metal Stamp Ink has been formulated to produce high quality impressions time after time.

SureMark Metal Stamp Ink is available in convenient 15ml dropper bottles.

Order Black Red or Blue ink.

SLR-200 Laser Rubber

Shiny SLR-200 is a latex based, Low Odour, product which produces excellent results when engraved with CO2 Laser Systems.

Key Features:

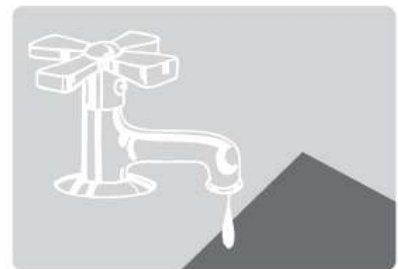

Creates Sharp and Rigid Text and Images
Easy to Clean
Low Odour
Compatible with Oil-Based Inks

Special Ink Compatible

Sharp and Rigid

Easy Cleaning

Shiny SLR-200 is compatible With ANY CO2 Laser Engraver.

Sheet Size: A4 – 297 x 210mm

Pack size: 10 sheets per pack

Thickness: 2.3mm

Colour: Grey

Daylight Negative Film

Some years ago Daylight Contact Films replaced silver sensitised films, cameras and darkrooms used for the production of negative film. These being an essential requirement to produce polymer plates or photopolymer stamp dies.

For many years the Print and Graphic Arts sector have worked on Computer to Plate or Computer to Film Digital technology.

Astron has selected the most appropriate Digital Technology for Computer to Negative processing for our customers needs.

NovaSharp Pearl 100

NovaSharp Pearl 100 is a semi-transparent, bright white, polyester based, matte finish film specifically designed for high toner adhesion at lower levels of toner consumption.

The special anti-static coating which provides sharp, smooth images is applied to both sides for ease of use and the product can be stack fed through most laser printers and copiers.

The high image density (dMax 2.40 to 2.70 when sprayed with NovaDense Plus) makes NovaSharp Pearl the best choice for photopolymer plates and liquid polymer stamp dies.

NovaSharp Pearl is daylight working.

NovaDense Plus

NovaDense Plus is an Image Density Booster solution that enhances the toner density. The enhanced density produces image quality comparable to silver sensitised film.

This solution is formulated to specifically enhance the image quality of NovaSharp films where high image density is required.

Just a light spray and the toner density will dramatically increase within a few seconds.

Liquid Polymer Sachets

Imagepac Xtra

Imagepac Xtra is the optimised pre-packaged liquid polymer printing plate. It provides you with benefits of lower cost, excellent image, cleanliness, faster plate processing and consistent quality.

Imagepac Xtra is the perfect product for making business stamps. It is pre-packaged 50 durometer photopolymer in a sachet with an integrated backing sheet to provide rigidity in the manufacturing and assembly process. It offers all the handling benefits of sheet polymer with the low cost and water washability of liquid resin.

Imagepac Xtra Saves Time and Money

No mess, no pouring resin, no spills and no need to clean up the exposure unit. No plate assembly time, no more laying film and tape and pouring resin, saving over 10 minutes on average per plate. Less waste typically providing the user with a reduction of up to 30% in waste resin, damming tape, cover film and backing sheet. Improved inventory control by only carrying one stock item, instead of four. Easier to use so can delegate manufacture to less-trained staff.

With Imagepac Xtra you no longer have worry about the skilful steps traditionally required in the photopolymer platemaking process.

Imagepac Xtra can be exposed on many different types of photopolymer equipment, even some sheet photopolymer exposure machines. Contact our technical staff for advice if you already have an exposure machine

.Imagepac Xtra is available in A4, A5, A6 and A7 sizes.

Liquid Polymer Accessories

"i" Series Additives and Supplies

IDEAL® iLW

Liquid Washout Concentrate

The Ideal iLW is a cost efficient liquid washout concentrate that effectively removes the uncured polymer during the washout stage. iLW provides excellent results and washout life whether it is used in automatic tank washout systems or hand washing. This is an important step to producing tack-free plates.*

IDEAL® iPX

The Ideal iPX is a patent pending post exposure additive that effectively eliminates tack when used with i Series photopolymers and iPW washout additive.*

*The iLW and iPX have been scientifically formulated to produce tack-free plates with i Series photopolymers. Use of other washout concentrates or post exposure additives may not yield the same tack-free results.

IDEAL® iBooster

The Ideal Booster is a washout additive that extends washout life in all water conditions. This is highly recommended for use when hard water conditions exist. The booster is used in addition to the iLW washout additive.

IDEAL® iDfoam

The Ideal iDfoam is a de-foamer that is added to the washout solution to eliminate foaming in spray washout equipment.

IDEAL® "c" Series Substrate

The Ideal "c" Series Substrate backing sheets have been developed to provide unprecedented adhesion to the photopolymer. The "c" series substrate also has excellent light diffusion which results in smoother, more consistent backgrounds.

IDEAL® Damming Tape

This tape provides a dam to keep the poured photopolymer in place over the cover film and negative. It helps to insure even and consistent total die height. This disposable foam tape is easy and economical to use.

Replacement Lamps

Replacement UV lamps with the optimal UV bandwidth are available for most photopolymer machines.

Odds & Ends

A collection of accumulated products that have nowhere else to go!!

MaxStamp Self Inking Stamps

MaxStamp is one of the foremost brands in North America.

M25 - 76 mm x 16 mm

M45 - 82 mm x 25 mm

While we do not import MaxStamps anymore we do have limited stock of these models.

Pocket Stamps

Handy Stamp - Pre Inked Pocket Stamp

A similar product to the Ultimark Traveller 50 which was very popular over many years.

Deskmate 3717 - Pre Inked Pocket Stamp A compact and light stamp which easily fits into a handbag or purse. Supplied with a keyring they are a great

option for people on the move.

Ideal Line Number Stamps

Deep moulded bands provide clean, sharp stamp impressions. Oversized band adjustment wheels prevent your fingers from contacting the date/number bands and make date/number adjustment easy.

The “N” Series stamps are an excellent choice for your high volume stamping needs.

While we do not import Ideal Stamps anymore we do have limited stock of some models

Generally available with either 6 or 8 bands with character height from 3mm to 11mm

Our experience

- Chris has been involved in the rubber stamp industry since 1977 when he joined Astron having trained in electronics with Telecom. Chris took over the reins from his father in 1989 and quickly set about building the business in the stamp industry. Chris is the only supplier representative to be elected President of the Rubber Stamp Industry Association.
- Trevor joined Modern Rubber Stamps in 1977 and worked in every role involved in stamp making. After some years Trevor was appointed as Sales and Marketing Manager and helped grow the business to a dominant position in the South Australia market. Modern Rubber Stamps is one of three manufacturers that were purchased and combined into Pelikan Artline's stamp operation. During a sabbatical from the industry Trevor worked on The Ghan railway for a short while where he accumulated the odd tale or two!
- John joined Astron in 1993 and immediately became responsible for technical support having worked with electronics for many years. John quickly became familiar with the various manufacturing processes used in the rubber stamp industry in order to provide sound advice to our customers.
- Jeremy joined Astron in 1999 while studying Computer Technology part time. Apart from providing IT and Computer services to the company Jeremy has spent much of his time in purchasing and logistics. Jeremy has wide product knowledge and has strong international contacts within the industry.
- Roxann is a highly qualified scientific photographer who joined Astron during 1999 when her skills were immediately put to work preparing product images for promotional purposes. Roxann's talents extend to graphic design and preparation of promotional materials for our clients.
- Roxine has been providing outstanding service to our customers since 2001 when she joined the company. Roxine's previous employment was as a Steward at Government House where she regularly served dignitaries and has even has served HM Queen Elizabeth! Roxine is the primary contact for day to day ordering and customer service.
- Kim joined the company as Financial Controller in 2004 and quickly set about becoming familiar with our customers and product range in addition to her substantive duties. Kim is often found in our warehouse picking and packing orders to help out and has proven to be very helpful in customer service whenever necessary.

Sales Information

□ **Prices**

Unless otherwise specified, all prices published by Astron Industries are in Australian Dollars and are subject to alteration without notice. Astron Industries will endeavour to provide reasonable forward advice of price changes wherever possible.

□ **Goods and Services Tax (GST)**

GST is not included in Astron's list prices. GST will be added to, and shown separately on, all invoices issued.

Invoices issued by Astron Industries are compliant Tax Invoices as defined under the New Tax System legislation.

□ **Dispatch of Goods**

Astron Industries will endeavour to dispatch all stock orders within 24 hours.

Orders received prior to 2pm on any business day for items held in stock will, under normal circumstances, be dispatched on that day.

□ **Freight**

Unless otherwise agreed freight will be charged as an additional item on all invoices issued for the supply of goods where the cost of freight can be reasonably determined at the time of shipment. Otherwise freight will be invoiced separately at a later time.

□ **Claims and Returns**

Claims will only be accepted within 30 days of the date of delivery.

Returns will only be accepted on prior arrangement and may incur a handling charge or re-stocking fee at the discretion of Astron Industries.

□ **Terms and Conditions of Sale**

Our Terms and Conditions Of Sale are incorporated by implication into all Sales Transactions undertaken by Astron Industries. A copy is included in all Full Line Price Lists issued by Astron. They can also be viewed or downloaded from our the3 Sales Information page of our website.
